

# "SUPPORTING THE CONSTRUCTION LANDSCAPE WITH FULLY FUNDED ESF DIGITAL TRAINING"

***The Lloyds Business Digital Index 2018 highlighted £84.5bn is being lost to the UK economy through 42% of SMEs not having the five basic digital skills***

*Building Growth South West is committed to supporting Construction SMEs across Devon through our fully funded ESF Digital Enablement (DESME) Programme.*

In partnership with:

# Construction Contractors - We Need You!

As part of the DESME programme, we are carrying out a regional skills analysis to identify the barriers Construction SMEs face when it comes to the adoption of digital skills.

This analysis will help us identify what bespoke training and resources need to be developed to support the Construction supply chain.

## *What we need from you:*

- **30 minutes - 1 hour with your supply chain (on or off site!)**

## **... That's it!**

Our analysis will simply be in the form of a short workshop - which can be carried out on or off site - with refreshments supplied by us!

**By helping us help your supply chain, you will be gaining the benefits of a digitally upskilled workforce - at no extra cost to you.**

SMEs that participate in these workshops will have the opportunity to take advantage of the free digital training and resources we develop.

# What can Building Growth South West Offer?

- Tailored resources for SME's to improve their digital services and offering to clients
- Improved digital competency within construction qualifications, training landscape and SME employers.
- Improved leadership and management skills within existing construction qualifications, training landscape and SME employers.
- Ongoing networks to improve the support from training providers for SMEs to access funding to make the business case to invest in digital upskilling.
- Tailored resources for SME's to improve their digital services and offering to clients
