Professional  
hours  
supporting  
Exeter College  
and local  
people

# Exeter College, Digital and Data Centre

## Introduction

The new Digital and Data Centre at Exeter College provides a nationally significant and prestigious digital learning centre in the heart of the city. Complete with digital learning laboratories, state-of-the-art IT suites and interactive seminar spaces, learners have access to cutting edge equipment to help them to move directly into industry or further study.

The Digital and Data Centre is the home of a variety of employer-led curriculum programmes at different education levels with the aim of proactively meeting the skills challenges of the future in the digital sector.

## Construction T Level engagement at Exeter College

As a government selected 'early adopter' of the new qualifications, Exeter College is one of the first providers in the country to be offering the new T Level qualifications; a technical based qualification, which is equivalent to three A Levels.

Due to the global pandemic Willmott Dixon were unable to provide onsite industry placements. To ensure that student and employer engagement continued they arranged a series of virtual talks and presentations. These took place over a 10 week period and were conducted by individuals from multiple construction backgrounds.

*'We really appreciate the effort that the Willmott Dixon team have made to augment our T Level students' learning, it is invaluable. We look forward to building our relationship even further in the future.'*

**Robin Goodman - Construction T Level Tutor**

**Total SRO Achieved including Local Labour and Local Spend**  
**£2,821,288.15 (30.7%)**
